Just wanted to let you know how please we are with the Factory Cat Rider Sweeper that we purchased from you for the Hawkeye Tennis Complex.

I was a little worried about the factory cat sweeper in regards to cleaning two different types of flooring but this machine is cleaning the turf area in 1.5 hours which would take us 2 hours every day to clean sections of the turf never getting it all done. The turf area is cleaner and looks brighter than it has ever look and the inside tennis courts looks brighter. It takes a little longer to clean the tennis courts but the difference in the way the courts like is worth it.

The machine we had been using was a propane operated sweeper and the custodial staff likes the fact that they don't have to deal with the propane tanks. We are getting enough run time from the batteries to do the job we need to do. That fact that we can use one machine to clean both areas has made a big different and has save us time. We now have one sweeper that takes care of the floors instead of the two different machines we were using and not getting the turf area real clean.

Thank you for your help in finding us the prefect sweeper that we could use for all the floors at the Hawkeye Tennis Complex.
