I wanted to drop you a note in regards to your XR Rider Floor Industrial Sweeper/Scrubber our company purchased 9 months ago. I was on a five person team whose task was to choose a new sweeper-scrubber for our shop. We had a four part criteria to which we would rate the demos.

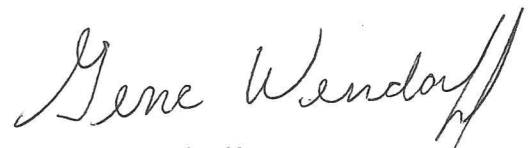

- 1) It had to clean consistently without leaving streaks.
- 2) It had to be able to maneuver in between machines and racking.
- 3) It had to be reliable; we clean our floors 5 days a week 3 to 4 hours per day. Maintenance had to be minimal. (We had a maintenance technician on the team to determine how he thought the machine was built.)
- 4) It had to be easy to use.

After looking at several different machines, we unanimously voted your machine the one for us. The review of our decision has been done and it was determined we could not be happier with the machine. The machine is solid and well built and has performed as advertised, flawless. When I take customers on tour through our shop, they 75% of them comment how clean our shop is.

In business, we do not hear enough good news; and I thought your company and all of the staff deserve a pat on the back for designing and producing a nice American made machine.

Good Job and much success.

Best regards,
Scott Wendorff
